

# Pressure Control Valves

## Safety Valves SV 29

Normal or Full Lift Threaded Valve

### Technical Data

Connection DN	15 - 25
Connection G	3/8A - 1A
Nominal Pressure PN	40 - 400
Set Pressure	0.1 - 330
Temperature	280°C
Medium	liquids, gases and steam

### Description

Safety valves are the ultimate protection device for tanks and pipelines. They prevent pressure limits being exceeded once all automatic control and monitoring equipment has failed.

SV 29 is a spring-loaded normal safety valve with threaded connection and closed spring cap. Component testing for connection sizes G 1/2 and G 3/4 for steam and gases up to 150 bar and liquids up to 40 bar.

Normal safety valves initially open proportionally up to a pressure rise of 10 %. This initial phase is followed by the full opening of the valve, allowing a large flow of medium.

Especially in the case of liquids, the wide proportional range results in a continuous operation.

Pressure rise:

above 1 bar set pressure: .....10 % up to required valve lift;  
below 1 bar set pressure: .....0.1 bar.

### Options

- » Special connections: ANSI flanges, NPT, other connections on request
- » Special versions on request

Operating instructions, know how and safety instructions must be observed. The pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.

### Available Versions

H2	without lifting device, gastight cap
H4	with lifting device, gastight cap
